

Conditions for
Accreditation
2020 Edition

February 10, 2020

National
Architectural
Accrediting
Board, Inc.

Introduction	ii
.....	
.....	
.....	
3.1 Program Criteria.....	2
PC.1 Career Paths.....	2
PC.2 Design.....	2
PC.3 Ecological Literacy and Responsibility	2
PC.4 History and Theory	2
PC.5 Research and Innovation.....	2
PC.6 Leadership and Collaboration.....	2
PC.7 Learning and Teaching Culture	2
PC.8 Social Equity and Inclusion.....	2
3.2 Student Criteria: Student Learning Objectives and Outcomes.....	3
SC.1 Health, Safety, and Welfare in the Built Environment	3
SC.2 Professional Practice	3
SC.3 Regulatory Context	3
SC.4 Technical Knowledge.....	3
SC.5 Design Synthesis	4
SC.6 Building Integration	4
.....	
4.1 Institutional Accreditation.....	5
4.2 Professional Degrees and Curriculum	5
4.3 Evaluation of Preparatory Education	6
.....	
5.1 Structure and Governance.....	7
5.2 Planning and Assessment	7
5.3 Curricular Development.....	7
5.4 Human Resources and Human Resource Development.....	7
5.5 Social Equity, Diversity, and Inclusion.....	8
5.6 Physical Resources	8
5.7 Financial Resources	8
5.8 Information Resources.....	8

Accreditation in architecture is a voluntary quality-assurance process by which services and operations are evaluated by a third party against a set of standards established by the third party, with input and collaboration from peers in the field. Accreditation is evidence that a collegiate architecture program has met standards essential to produce graduates who have a solid educational foundation and are capable of leading the way in innovation, emerging technol

These criteria seek to evaluate the outcomes of architecture programs and student work within their unique institutional, regional, national, international, and professional contexts, while encouraging innovative approaches to architecture education and professional preparation.

A program must demonstrate how its curriculum, structure, and other experiences address the following criteria.

—How the program ensures that students understand the paths to becoming licensed as an architect in the United States and the range of available career opportunities that utilize the discipline's skills and knowledge.

—How the program instills in students the role of the design process in shaping the built environment and conveys the methods by which design processes integrate multiple factors, in different settings and scales of development, from buildings to cities.

—How the program instills in students a holistic understanding of the dynamic between built and natural environments, enabling future architects to mitigate climate change responsibly by leveraging ecological, advanced building performance, adaptation, and resilience principles in their work and advocacy activities.

—How the program ensures that students understand the histories and theories of architecture and urbanism, framed by diverse social, cultural, economic, and political forces, nationally and globally.

—How the program prepares students to engage and participate in architectural research to test and evaluate innovations in the field.

—How the program ensures that students understand approaches to leadership in multidisciplinary teams, diverse stakeholder constituents, and dynamic physical and social contexts, and learn how to apply effective collaboration skills to solve complex problems.

A program must demonstrate how it addresses the following criteria through program curricula and other experiences, with an emphasis on the articulation of learning objectives and assessment.

—How the program ensures that students understand the impact of the built environment on human health, safety, and welfare at multiple scales, from buildings to cities.

—How the program ensures that students understand professional ethics, the regulatory requirements, the fundamental business processes relevant to architecture practice in the United States, and the forces influencing change in these subjects.

—How the program ensures that students understand the fundamental principles of life safety, land use, and current laws and regulations that apply to buildings and sites in the United States, and the evaluative process architects use to comply with those laws and regulations as part of a project.

—How the program ensures that students understand the established and emerging systems, technologies, and assemblies of building construction, and the methods and criteria architects use to assess those technologies against the design, economics, and performance objectives of projects.

These criteria will be evaluated at the understanding level. The program will submit the primary exhibits as evidence for SC.1-4 to the visiting team in an electronic format 45 days before the visit. Programs must provide the following:

: A narrative description of how the program achieves and evaluates each criterion.

: Evidence that each student learning outcome associated with these criteria is developed and assessed by the program on a recurring basis, with a summary of the modifications the program has made to its curricula and/or individual courses based on findings from its assessments since the previous review.

: Supporting materials demonstrating how the program accomplishes its objectives related to each criterion. Organize the supporting exhibits in the format specified by the NAAB and include the following for each course associated with the student learning outcome:

- a) *. The syllabus must clearly articulate student learning outcome objectives for the course, the methods of assessment (e.g., tests, project assignments), and the relative weight of each assessment tool used by the instructor(s) to determine student performance.*
- b) *. The schedule must clearly articulate the topics covered in the class and the amount of time devoted to each course subtopic.*
- c) *. The supporting materials must clearly illustrate the instructional materials used in the course. These may include a summary of required readings, lecture materials, field trips, workshop descriptions, and other materials used in the course to achieve the intended learning outcomes.*

—How the program ensures that students develop the ability to make design decisions within architectural projects while demonstrating synthesis of user requirements, regulatory requirements, site conditions, and accessible design, and consideration of the measurable environmental impacts of their design decisions.

—How the program ensures that students develop the ability to make design decisions within architectural projects while demonstrating integration of building envelope systems and assemblies, structural systems, environmental control systems, life safety systems, and the measurable outcomes of building performance.

These criteria will be evaluated at the ability level. Programs may design their curricula to satisfy these criteria via a single course or a combination of courses. Evidence supplied for these required courses is provided in the team room and include fully labeled exhibits of student work from each course section. Programs must provide the following:

: A narrative description of how the program achieves and evaluates each criterion.

: Evidence that each student learning outcome associated with these criteria is developed and assessed by the program on a recurring basis, with a summary of the modifications the program has made to its curricula and/or individual courses based on findings from its assessments since the previous review. If the program accomplishes these criteria in more than one course, it must demonstrate that it coordinates the assessment of these criteria across those courses.

: Supporting materials demonstrating how the program accomplishes its objectives related to each criterion. Organize the supporting exhibits in the format specified by the NAAB and include the following for each course associated with the student learning outcome:

- a) *. The syllabus must clearly articulate student learning outcome objectives for the course, the methods of assessment (e.g., tests, project assignments), and the relative weight of each assessment tool used by the instructor(s) to determine student performance.*
- b) *. The schedule must clearly articulate the topics covered in the class and the amount of time devoted to each course subtopic.*
- c) *. The exhibits must clearly illustrate the instructional materials used in the course. These may include a summary of required readings, lecture materials, field trips, workshop descriptions, and other materials used in the course to achieve the intended learning outcomes.*

: The program must collect all passing student work produced for the course(s) in which the learning outcomes associated with this criterion are2.βth)C-002 A(s)-2.βns with conr

This condition addresses the institution's regional accreditation and the program's degree nomenclature, credit-hour and curricular requirements, and the process used to evaluate student preparatory work.

For the NAAB to accredit a professional degree program in architecture, the program must be, or be part of, an institution accredited by one of the following U.S. regional institutional accrediting agencies for higher education:

NAAB-accredited professional degree programs have the exclusive right to use the B. Arch., M. Arch., and/or D. Arch. titles, which are recognized by the public as accredited degrees and therefore may not be used by non-accredited programs.

The number of credit hours for each degree is outlined below. All accredited programs must conform to minimum credit-hour requirements established by the institution's regional accreditor.

- 4.2.4 The B. Arch. degree consists of a minimum of 150 semester credit hours, or the quarter-hour equivalent, in academic coursework in general studies, professional studies, and optional studies, all of which are delivered or accounted for (either by transfer or articulation) by the institution that will grant the degree. Programs must document the required

The NAAB expects accredited degree programs to provide information to the public about accreditation activities and the relationship between the program and the NAAB, admissions and advising, and career information, as well as accurate public information about accredited and non-accredited architecture programs. The NAAB expects programs to be transparent and accountable in the information provided to students, faculty, and the public. As a result, all NAAB-accredited programs are required to ensure that the following information is posted online and is easily available to the public.

All institutions offering a NAAB-accredited degree program or any candidacy program must include the *exact language* found in the *NAAB Conditions for Accreditation, 2020 Edition*, Appendix 2, in catalogs and promotional media, including the program's website.

The program must make the following documents available to all students, faculty, and the public, via the program's website:

- a) *Conditions for Accreditation, 2020 Edition*
- b) *Conditions for Accreditation* in effect at the time of the last visit (2009 or 2014, depending on the date of the last visit)
- c) *Procedures for Accreditation, 2020 Edition*
- d) *Procedures for Accreditation* in effect at the time of the last visit (2012 or 2015, depending on the date of the last visit)

The program must demonstrate that students and graduates have access to career development and placement services that help them develop, evaluate, and implement career, education, and employment plans.

To promote transparency in the process of accreditation in architecture education, the program must make the following documents available to all students, faculty, and the public, via the program's website:

- a) All Interim Progress Reports and narratives of Program Annual Reports submitted since the last team visit
- b) All NAAB responses to any Plan to Correct and any NAAB responses to the Program Annual Reports since the last team visit
- c) The most recent decision letter from the NAAB
- d) The Architecture Program Report submitted for the last visit
- e) The final edition of the most recent Visiting Team Report, including attachments and addenda
- f) The program's optional response to the Visiting Team Report
- g) Plan to Correct (if applicable)
- h) NCARB ARE pass rates
- i) Statements and/or policies on learning and teaching culture
- j) Statements and/or policies on diversity, equity, and inclusion

The program must publicly document all policies and procedures that govern the evaluation of applicants for admission to the accredited program. These procedures must include first-time, first-year students as well as transfers from within and outside the institution. This documentation must include the following:

- a) Application forms and instructions
- b) Admissions requirements; admissions-decisions procedures, including policies and processes for evaluation of transcripts and portfolios (when required); and decisions regarding remediation and advanced standing
- c) Forms and a description of the process for evaluating the content of a non-accredited degrees
- d) Requirements and forms for applying for financial aid and scholarships
- e) Explanation of how student diversity goals affect admission procedures

6.6.1 The program must demonstrate that students have access to current resources and advice for making decisions about financial aid.

6.6.2 The program must demonstrate

Changes to the *Conditions for Accreditation* and the *Procedures for Accreditation* are outlined in Section 6.2 of the NAAB Policy Manual. That section is referenced below for information:

The NAAB's *Conditions* and *Procedure* have been revised several times over the years. These revisions reflect the NAAB's commitment to continuous improvement by allowing programs the flexibility to adapt to
